

spare- and replacement parts for road construction equipment

Winter Campaign 2017/18
★★

01.11.2017 - 31.03.2018

Original FINK wear parts

Our high-quality wear parts are developed and produced in Germany. They are extremely resistant. Our parts' long durability gives you the benefit of less time needed for exchanges.

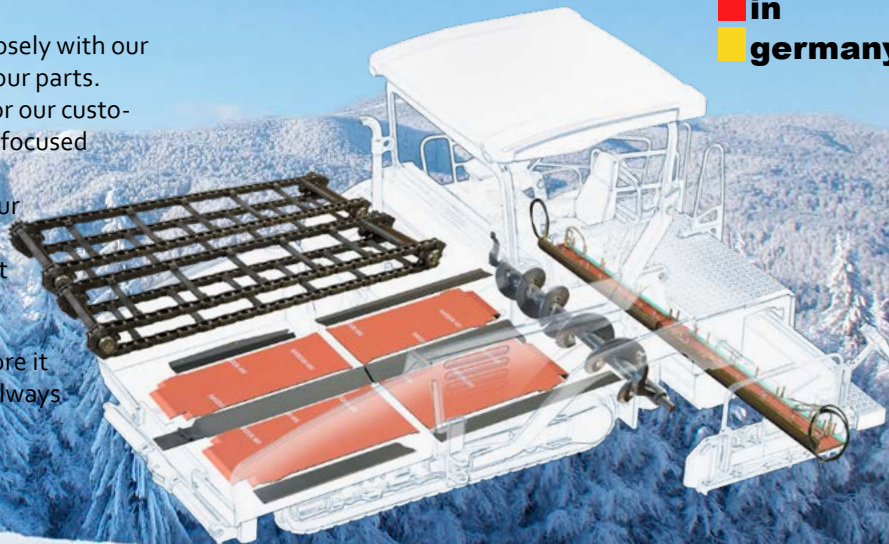

In an ongoing innovation-process we cooperate closely with our customers and their needs to continue improving our parts.

We achieve highest quality and optimum results for our customers through exact development and short-term, focused implementation of the results.

Beneficiaries to our high-value products are also our experience and know-how as well as the instincts of our employees and the state-of-the-art technology we use.

Each part is scrutinized in a final quality check before it is shipped to one of our customers. Thus you can always rely on the quality of Original FINK parts.

spare- and replacement parts for road construction equipment

*Original FINK parts...
...increase the reliability of your machines
through spare parts from FINK.*

Quite often it is only a small thing that causes a machine to stop. In the worst case, it causes the hold-up of the whole construction site. Baumaschinen FINK's express services ensure that needed spare parts reach the construction site as quickly as possible so you can continue in your work.

Should your machine fail because of a defect in one of the electronic devices (sensors etc.) our repair service can help. We offer all-over service for your device. Our experts make sure that your machine can continue running perfectly by using state-of-the-art technology and profound specialized knowledge.

Now in winter, when the machines are being maintained and preparations are being made for the new season, you need a strong partner like FINK where you can always rely 100% on the quality of the spare and replacement parts for your machines.

*Order now so that everything runs
smoothly in the new season.*

**If your order value exceeds
2500 €, you will receive a high-
quality softshell vest for free.**

spare- and replacement parts for road construction equipment

Most important in the usage of material hoppers is a residue-free transport and a secure incorporation of the mix.

All parts for the material hopper, produced by us, were developed, improved and tested accordingly.

It is up to you if you order single parts or complete sets.

Material hopper (kit) for Vögele, Dynapac, Volvo and Bomag.

Original FINK material hopper rubbers

Original FINK return sheaves

- Floor plates
- Central and lateral guards
- Material transport system
- Mounting material

Original FINK drive shaft for conveyors, completely mounted

Original FINK conveyor chains, completely mounted

As usual with FINK, you can order the goods as single parts or as complete service kit.

spare- and replacement parts for road construction equipment

Auger screws for Vögele, Dynapac, Volvo and Bomag

The augers' quality is responsible on how homogeneously the mix can be spread.
You can secure the quality of your paver with original FINK parts.

We offer the following parts:

- Auger blades
- Auger shafts
- Bearings
- Drive chains
- Chain wheels
- Fastening material

Original FINK auger screw: complete set

Original FINK auger screw,
completely mounted

Original FINK augers (set)

As usual with FINK, you can order the goods as single parts
or as complete service kit.

spare- and replacement parts for road construction equipment

Screeds for Vögele, Dynapac, Volvo and Bomag

Screeds are responsible to compact the mix evenly over the complete working width, creating a closed and even structure.

All parts in a screed are subjected to severe strains. Original FINK parts ensure that they meet the highest expectations and that you can rely on the parts' quality.

We do not only offer spare and replacement parts for your existing screed but also, if needed, extensions for a wider working area. You also get service kits for right and left extension parts.

Guide bars

Sliding blocks

We offer the following components for screeds:

- Screed plates
- Pressure bars (as required)
- Tamper bars
- Heating rods
- Insulating and mounting material
- Repair kit for screeds
- Extensions and repair kits for extensions (right and left)

Screeds

As usual with FINK, you can order the goods as single parts or as complete service kit.

spare- and replacement parts for road construction equipment

Crawler parts for Vögele, Dynapac, Volvo and Bomag

Pavers' running surfaces have to endure constant and severe strain.

We offer all parts in highest quality for crawler-run pavers:

- Track chains (without track pads)
- track rollers
- sprockets
- track pads

Track pads with excellent running properties

Track rollers for less maintenance and better guidance of the chain

Track chains with high strength and long service life

Sprockets:
exactly fitting and efficient

As usual with FINK, you can order the goods as single parts or as complete service kit.

spare- and replacement parts for road construction equipment

Filters for Vögele, Dynapac, Volvo and Bomag

If wished we stipulate service intervals with you and send wear parts like filters in the agreed time frames.

Whether you want to arrange service intervals or order individually, we deliver any filter.

Our product range includes:

- Air filters
- Oil filters
- Fuel filters
- Hydraulic filters

As usual with FINK, you can order the goods as single parts or as complete service kit.

Lubricants

Lubricants protect pavers from wear out and corrosion.

Choose from our wide range of oils and greases, the right additive for your needs:

- Engine oils (suitable also for longer service intervals)
- Hydraulic oils (for optimum cold start behaviour and long service intervals)
- Transmission oils (mineral or fully synthetic)
- Grease for friction and anti-friction bearings
- High-performance grease for telescoping tubes (silicone based)

With our lubricants you can increase service life and performance of your machine. You also protect them from wear out even under hardest working conditions..
