spare- and replacement parts for road construction equipment

Your Original FINK-Service

High availability

To quickly resolve a problem, the availability of critical parts and components is essential for you in case of need. That's why we stock around 15,000 parts in our modern central warehouse.

We ship overnight, by parcel service, truck or courier, air freight and sea freight - fast, safe and professional.

First-class consulting

Tell us the type and serial number of your machine, and we will search for the proper original FINK part, and organize quick and safe transport. But we are also open for any "highly customized" inquiries.

Precision and durability

We manufacture in Germany and take advantage of short routes and alignment processes. This enables us to achieve superior quality, accuracy and durability.

Order now so that everything runs smoothly in the new season.

If your order value exceeds € 2500 you will receive a high-quality softshell jacket for free.

(Only while supply lasts)

Most important in the usage of material hoppers is a residue-free transport and a secure incorporation of the mix.

All parts for the material hopper, produced by us, were developed, improved and tested accordingly.

It is up to you if you order single parts or complete sets.

Original FINK spare parts for Vögele, Dynapac, Volvo and Bomag

Material hopper (kit) for Vögele, Dynapac, Volvo and Bomag.

Original FINK material hopper rubbers

Original FINK return sheaves

- Floor plates
- Central and lateral guards
- Material transport system
- Mounting material

Original FINK drive shaft for conveyors, completely mounted

Original FINK spare parts for Vögele, Dynapac, Volvo and Bomag

The augers' quality is responsible on how homogeneously the mix can be spread.
You can secure the quality of your paver with original FINK parts.

We offer the following parts:

- Auger blades
- Auger shafts
- Bearings
- Drive chains
- Chain wheels
- Fastening material

Original FINK auger screw: complete set

Original FINK auger screw,
completely mounted

Original FINK augers (set)

As usual with FINK, you can order the goods as single parts
or as complete service kit.

Original FINK spare parts for Vögele, Dynapac, Volvo and Bomag

Screeds are responsible to compact the mix evenly over the complete working width, creating a closed and even structure.

All parts in a screed are subjected to severe strains. Original FINK parts ensure that they meet the highest expectations and that you can rely on the parts' quality.

We do not only offer spare and replacement parts for your existing screed but also, if needed, extensions for a wider working area. You also get service kits for right and left extension parts.

Guide bars

Sliding blocks

We offer the following components for screeds:

- Screed plates
- Pressure bars (as required)
- Tamper bars
- Heating rods
- Insulating and mounting material
- Repair kit for screeds
- Extensions and repair kits for extensions (right and left)

Screeds

As usual with FINK, you can order the goods as single parts or as complete service kit.

Pavers' running surfaces have to endure constant and severe strain.

We offer all parts in highest quality for crawler-run pavers:

- Track chains (without track pads)
- track rollers
- sprockets
- track pads

Original FINK spare parts for Vögele, Dynapac, Volvo and Bomag

Track pads with excellent running properties

Track rollers for less maintenance and better guidance of the chain

Track chains with high strength and long service life

Sprockets:
exactly fitting and efficient

As usual with FINK, you can order the goods as single parts or as complete service kit.

Original FINK spare parts for Vögele, Dynapac, Volvo and Bomag

If wished we stipulate service intervals with you and send wear parts like filters in the agreed time frames.

Whether you want to arrange service intervals or order individually, we deliver any filter.

Our product range includes:

- Air filters
- Oil filters
- Fuel filters
- Hydraulic filters

As usual with FINK, you can order the goods as single parts or as complete service kit.

Lubricants

Lubricants protect pavers from wear out and corrosion.

Choose from our wide range of oils and greases, the right additive for your needs:

- Engine oils (suitable also for longer service intervals)
- Hydraulic oils (for optimum cold start behaviour and long service intervals)
- Transmission oils (mineral or fully synthetic)
- Grease for friction and anti-friction bearings
- High-performance grease for telescoping tubes (silicone based)

With our lubricants you can increase service life and performance of your machine. You also protect them from wear out even under hardest working conditions..
